

CSCI4140 - Tutorial 10
Introduction To Chrome
Extension & jQuery DOM Tree

Week 11

Calvin Kam, Ho Chuen (hckam@cse)

SHB913

Outline

- ⌚ What is Chrome Extension? Recap
- ⌚ How to select DOM Object in jQuery?
- ⌚ Sample Chrome Extension

Chrome Extension

- Powerful tools to interact with Chrome and the web content!

Extensions

Don't do that in real life btw....

Chrome Extension - Architecture

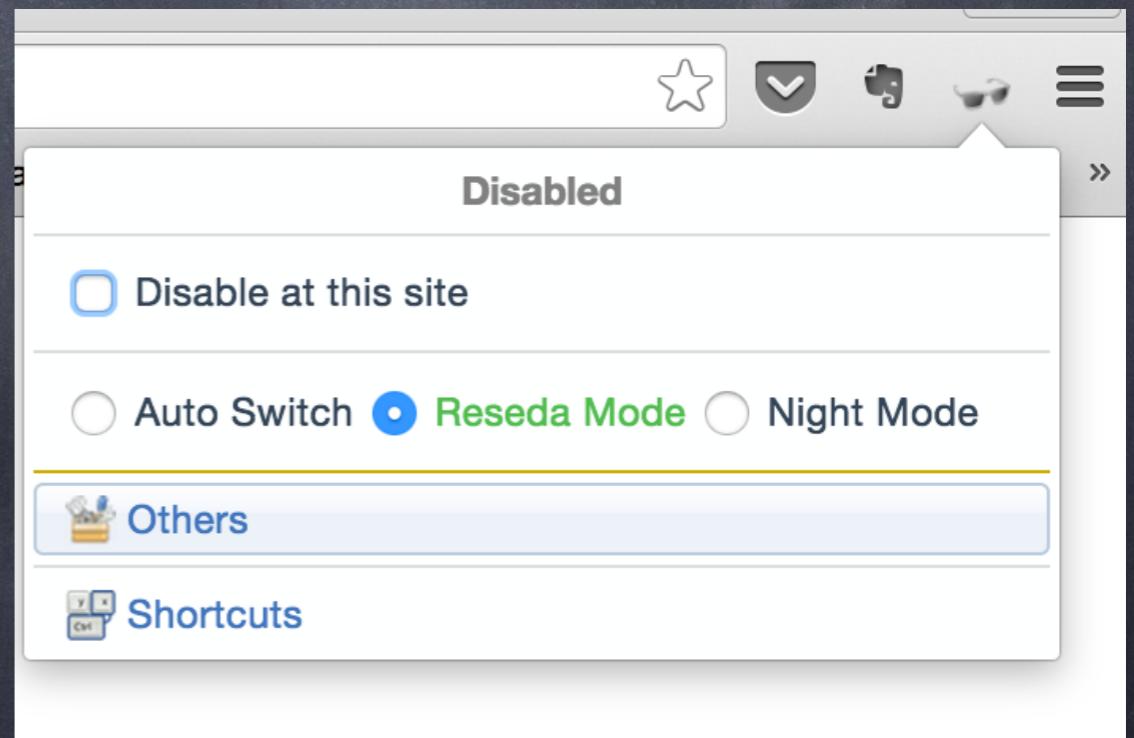

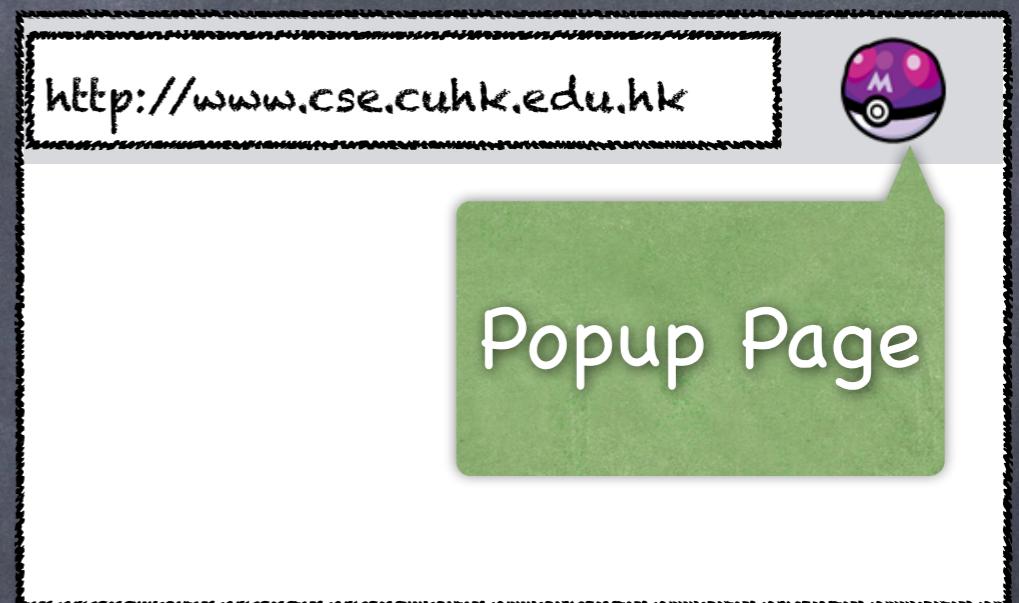

Background Page

- “Spirit” of the extension
- Do most of the jobs behind the Chrome.
- Exists in the lifetime of an extension
- Example: Checking the Mail and send you alerts.

Browser Action

- An optional UI page to interact with Users when the button is clicked.

Content Script

- The only component can directly access the Document Object Model (DOM) of the webpage.
- Directly be injected into the webpage.

Communication among those components

- ⦿ Content scripts cannot run Chrome API
 - ⦿ Eg: Notification, Storage etc.
- ⦿ Background Page cannot access DOM Object
- ⦿ Solution: Use Message Passing!

Message Passing

`chrome.runtime.sendMessage`

`http://www.cse.cuhk.edu.hk`

A rectangular box representing a content script. It has a purple header bar with the text "Content Script". The main body of the box is white. In the top right corner, there is a small circular icon containing a purple and white design, possibly representing a browser tab or extension icon.

`chrome.runtime.onMessage.addListener`

Background Page

Sample Chrome Extension

- It is annoying to enter student ID and password each time!! 😞
- Let's do something to automate the form completion task.....

 Login to CUHK Wi-Fi Service

Note:

1. The CUHK Wi-Fi Service is for University staff and students exclusively use only.
2. By default, you can browse CUHK homepage at <http://www.cuhk.edu.hk> even though you have not yet login to the Wi-Fi service. For other webpages, you will be first prompted to enter your account.
3. Logging in the service indicates you have read and accepted the [Use Policies and Guidelines](#).
4. Except for the initial CWEM authentication, all the data are transferred in plain text without encryption.
5. For a secured connection or accessing some University restricted websites, you should run a [VPN](#) connection additionally over this Wi-Fi service.
6. According to the University policy, Win XP computer is not allowed to connect to the campus network. Please upgrade your computer to Win 7 or above if you want to connect to the campus network.
7. For service details, please visit <http://www.cuhk.edu.hk/itsc/network/wlan>

Please enter your CWEM account and password to login CUHK Wi-Fi Service.

CUHK Wi-Fi Login Helper

Background Page

- Handle Browser Action
- Prompt Notification

- Click to open login page

Content Script

- Fill in the form
- Get the result and tell BG Page

Manifest

```
{  
  "name": "CUHK Login WiFi Login Tool",  
  "manifest_version": 2,  
  "version": "1.0",  
  "description": "A Demo Extension for logging in to the CUHK WiFi",  
  "icons": { "48": "cuhk.png" },  
  "background": {  
    "scripts": [ "background.js" ]  
  },  
  "permissions": [ "activeTab", "tabs", "notifications" ],  
  "browser_action": {  
    "default_title": "",  
    "default_icon": "cuhk.png"  
  },  
  "content_scripts": [  
    {  
      "matches": [ "https://securelogin.wlan.cuhk.edu.hk/upload/custom/CU_Portal/  
*", "file:///*" ],  
      "js": [ "jquery-2.1.3.min.js", "action.js" ],  
      "run_at": "document_end"  
    }  
  ]  
}
```

Basic Info

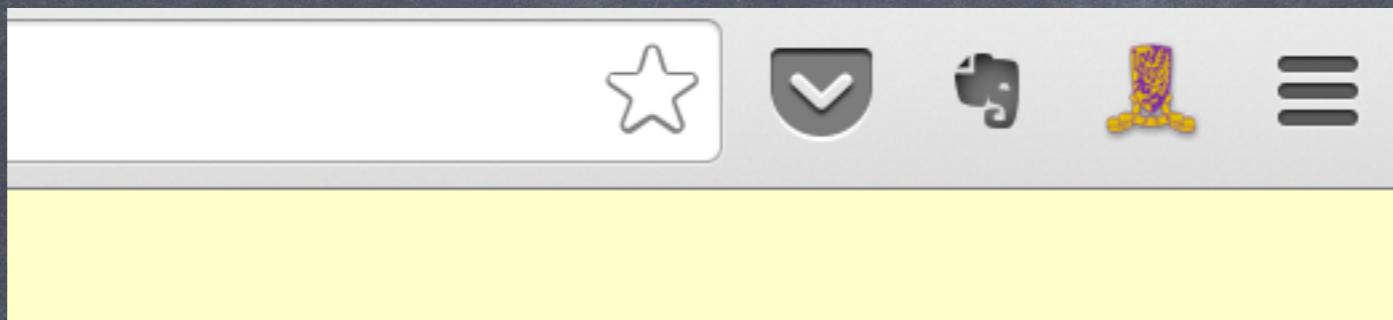

Background Script

Permission

Browser Action

Content Script

Browser Action

Clicked to create a tab to navigate to login page
-> onClick Listener!

Need "tabs" permission here

```
chrome.browserAction.onClicked.addListener(function(tab){  
    chrome.tabs.create({url:"https://  
securelogin.wlan.cuhk.edu.hk/upload/custom/CU_Portal/  
login.html"},function(tab){  
});  
});
```

Content Script

- ④ To Fill in the form, we need to find the target!

- ④ We can use Chrome Developer Console to peek who are they... ☺

Elements Network Sources Timeline Profiles Resources Audits Console

```
> <script>...</script>
  <div id="errorbox" style="display: none">
  </div>
  <table width="708" border="0">
    <tbody>
      <tr>
        <td width="388">
          <label for="user" accesskey="u">Computing ID </label>
          <input type="text" name="user" id="user" size="25" class="text" accesskey="u"
          using CWEM accounts">
        </td>
        <div id="passwordbox">...</div>
        <div id="fqdnbox" style="display: none"></div>
        <input type="hidden" name="cmd" value="authenticate">
```

Introduction to jQuery Selector

- In the previous lectures, you learnt a lot about DOM scripting.

```
document.getElementById("ID")
```

Why Not Go jQuery?

```
$("#ID")
```

<http://www.cse.cuhk.edu.hk>

ID:

jQuery

- ⦿ A Great Framework to save our life.
- ⦿ Easy to use, and much handy than using javascript alone.
- ⦿ Borrows the idea of CSS, you can use the css-style selectors to specify the object. 

ID `$("#abc")`

Class `$(".abc")`

Element `("form")`

Sample HTML

```
<form class="form-signin">
<input type="email" id="inputEmail"
class="form-control" placeholder="Email
address">
<input type="password" id="inputPassword"
class="form-control"
placeholder="Password">
<button class="btn btn-lg btn-primary
btn-block" type="submit">Sign in</button>
</form>
```

How do I get the textbox
and change the value?

How do I submit the form?

Sample HTML

```
<form class="form-signin">
<input type="email" id="inputEmail"
class="form-control" placeholder="Email
address">
<input type="password" id="inputPassword"
class="form-control"
placeholder="Password">
<button class="btn btn-lg btn-primary
btn-block" type="submit">Sign in</button>
</form>
```

```
$("#email").val("Hello")
```

```
 $("form").submit()
```

Back to Example

- How do you fill in the form of CUHK Wi-Fi Page?

Please enter your CWEM account and password to login CUHK Wi-Fi Service.

“errorbox” div

CADS
(CADS Reference Number: 048)

For any enquiries, please contact ITSC Service Desk at <http://servicedesk.itsc.cuhk.edu.hk>

Information Technology Services Centre, The Chinese University of Hong Kong.

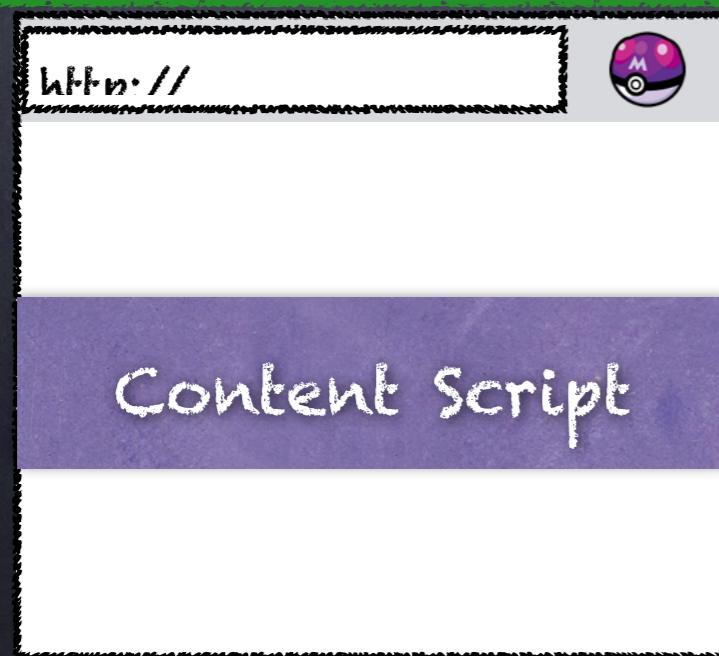

Oops! How about error message?

```
var url = window.location.href;  
if(url.search("errmsg") == -1)  
{  
// Fill In the form la  
}  
else  
{  
if($("#errorbox").length) // Check if the error box div exists  
{  
// Need to tell Background page!  
}  
}
```

Message Passing- Sender

```
chrome.runtime.sendMessage(string extensionId, any message, object options,  
function responseCallback)
```

```
var errText = $("#errorbox").text();  
chrome.runtime.sendMessage({msg: errText},  
function(response) {});
```

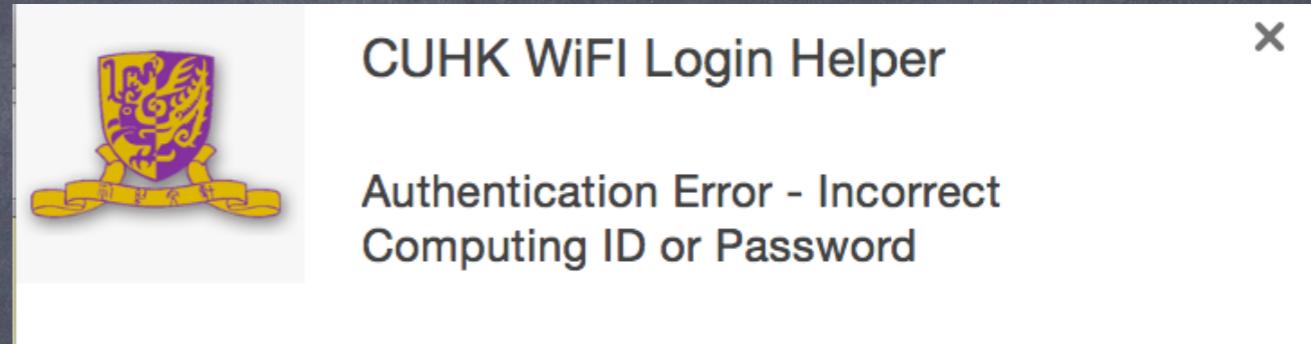

Message Passing- Receiver

- In form of action listener....

```
chrome.runtime.onMessage.addListener(function callback)
```

```
chrome.runtime.onMessage.addListener(function(request, sender,  
sendResponse){  
    // Received in request.msg  
});
```

Notification

- Need to call in background page! (Remember content script is injected already into the webpage.)
- Need to grant “notification” permission in manifest!

```
chrome.notifications.create(string notificationId,  
NotificationOptions options, function callback)
```

```
chrome.notifications.create("",  
{type:"basic",iconUrl:"cuhk.png",title:"CUHK WiFi Login  
Helper",message:request.msg},function(id){});
```
